

Datum	Namn	Avhandlingens titel
1993-04-02	István Köpf	Chromosome aberrations in reallion to malignant disease – a cytogenetic investigation
1995	Jan Nyman	Normal skin reactions in radiotherapy. Proliferation, progression and prognostic factors
1997-05-22	Göran Borghede	Treatment of localised prostatic carcinoma with reference to radiotherapy treatment methods, local cure, late side effects and development of a disease specific quality of life questionnaire
1997-10-10	Lena Karlsson	Hormonal regulation of growth in human endometrial adenocarcinomas. Role of the p53 gene
1998-01-16	Per Karlsson	Cancer incidence after exposure to low dose and high dose ionising radiation
1999-11-05	Thomas Björk-Eriksson	Potential biological markers of tumour response to radiation therapy in head and neck cancers
2000-05-25	Kecke Elmroth	Hypothermia and radiation: effects on DNA, chromatin and cellular survival
2000-10-06	Håkan Andersson	Radioimmunotherapy of experimental ovarian cancer with Astatine-211 – an in vivo model for consolidation treatment in women
2000-11-02	Per Albertsson	Matrix metalloproteinases in natural killer cells. Expression of MMPs, IL-2 activation, and killer cell interactions with Matrigel® and model tumours
2002-05-24	Susan Strang	Spritual/existential issues in palliative care with special reference to patient with brain tumours and their spouses
2004-02-06	Zakaria Einbeigi	Hereditary breast and ovarian cancer in Western Sweden – with a special focus on BRCA1 3171ins5 mutation

2004-11-12	Erik Holmberg	Methodological aspects on excess cancer risk after exposure to ionizing radiation
2005-10-07	Anna Danielsson	Intrinsic radiosensitivity and molecular targets for tumour radiosensitization of head and neck cancer with special reference to chromosomal instability and pentoxifylline
2006-05-24	Hedda Haugen	Prognostic and predictive factors in laryngeal cancer treatment with radiotherapy
2007-06-11	Katarina Engström	Clinical and molecular studies of liposarcoma
2007-11-02	Zahra Taheri-Kadkhoda	Nasopharyngeal carcinoma: past, present and future directions
2008	Margaretha Åkeson	Clinical outcome and prognostic factors in borderline ovarian tumors and invasive ovarian carcinomas in western Sweden
2008-06-05	Karolina Partheen	New prognostic markers in stage III serous ovarian adenocarcinomas
2009-02-27	Kristina Levan	Molecular characterization of type 1 endometrial carcinomas
2009-05-29	Lovisa Österberg	Characterization of genetic alterations in ovarian cancer associated with chemotherapy response
2009-06-05	Elin Karlsson	Novel biomarkers predicting long-term survival in breast cancer
2009-09-18	Karin Edsparr	Migration of natural killer cells. Matrix interaction, locomotion and regulation of matrix metalloproteinases (MMPs) by IL-2 and chemokines
2011-04-15	Helene Svensson	Quality of life and psychological reactions in women on first line chemotherapy for metastatic breast cancer. Correlations to tumour response and predictive factors.
2011-05-27	Kristina Claesson	Radiobiological effects of alpha-particles from Astatine-211 from DNA damage to cell death.
2011-10-21	Thordis Thorsteinsdottir	Maintaining quality of life after prostate cancer diagnosis

2010-02-16

2012-01-20	Andreas Hallqvist	Optimization of radiotherapy in locally advanced lung cancer
